5-Day Hybrid and Electric Vehicle Systems Technician Training

March 12-16 2012

Class limited to 20 participants

Registration ends
January 31st, 2012!

Training and Sponsored by:
Automotive Research and Design

Hosted by:
Goodyear Tire and Service Academy
NAPA Autotech
*8802 Exchange Drive
Orlando, FL 32809*

This extensive 5-day combination lecture & hands-on 5-day course will cover the fundamentals and advanced electric propulsion concepts, blending traditional engine & electric propulsion torque, system design, basic and enhanced diagnostic considerations, and special service topics of HEVs. In an easy to understand format, this course will explain safety and electric propulsion systems including the construction, operation, control strategies, service tools, scan tool data, and basic diagnostic fundamentals. Also included will be the discussion and use of oscilloscopes, current probes, differential scope probes, electric machine test equipment, and specific scan tool PIDs to be used to support hands-on exercises for enhanced analysis and diagnostics. Additional Information about hands-on training is located at www.go2hev.com.
